

# Talk to us about MMR

Take your child's Red Book or vaccine record to their vaccination appointment. You can ask the nurse any questions you have about the MMR or other vaccines.

MMR does not cause autism. Many studies have shown there is no link between MMR and autism. Your nurse will be happy to answer any questions you have about this in your appointment.

Ask your GP or nurse for an MMR vaccine without pork ingredients if you need it.

There are two brands of MMR vaccine in the UK – MMR VaxPro and Priorix. MMR VaxPro contains pork gelatine and Priorix does not.

If your child needs an MMR vaccine without pork ingredients, tell your doctor or nurse and they will be given a Priorix vaccine.

## Is your child fully vaccinated against measles?

Measles cases are increasing in London

### What is measles?

Measles is a very contagious disease that can make kids seriously unwell if they're not fully vaccinated. Measles is also very serious in pregnancy and for people with weakened immune systems.

There is no cure for measles and it can lead to complications like pneumonia and in rare cases can lead to long term disability or death.

# Measles symptoms

- Measles usually starts with cold-like symptoms, followed by a rash a few days later.
- The rash starts on the face and behind the ears before spreading to the rest of the body.
- The rash looks brown or red on white skin. It may be harder to see on brown and black skin.

## If you think your child has measles

If you or your child has symptoms of measles, stay at home. Measles can spread easily so call your GP surgery before going in. They may suggest talking over the phone. You can also call NHS **111** for advice.

Find out more about symptoms and see photos of the measles rash at [nhs.uk/conditions/measles](https://nhs.uk/conditions/measles)

# The MMR vaccine is safe and effective

Two doses of the measles, mumps and rubella (MMR) vaccine is the only protection against the most severe forms of measles. The vaccine also offers protection against mumps and rubella. It is safe and effective and always free for everyone on the NHS.

MMR vaccinations are needed at age:

**1 year**

**3 years and 4 months**

If your child has missed either or both of these vaccines, it's not too late to catch up.

# Getting a free MMR vaccine

- Check if your child is up to date with their measles vaccinations by looking in their Red Book (or vaccine record). If you're not sure, contact your GP to book a free vaccine appointment.
- You can find free vaccine appointments near you at [schoolvaccination.uk/catch-up-camden](https://schoolvaccination.uk/catch-up-camden) or by calling **020 4603 3495**.
